PeopleCert  
**DevOps.**

## Effectiveness & efficiency beyond comparison.

Introducing **PeopleCert DevOps**, the new suite of qualifications that provides practical guidance on how to successfully apply DevOps in day-to-day work. Professionals can embark on a DevOps journey with three modules that support effectiveness in daily performance and are enriched with guidance on integration with IT operations practices, focusing on value and quality.

### Addressing organisations' real business needs

PeopleCert DevOps Qualifications help organisations close the skills-gap and support the realisation of their business objectives. The training content provides practical guidance on how to apply DevOps and integrate it with existing IT operations activities. Additionally, the course can be customised to suit organisations' specific requirements.

### Hands-on guidance for professionals

The DevOps approach to work has become a sought-after resource across industries and a growing number of organisations are looking for DevOps-savvy professionals. PeopleCert DevOps Qualifications offer practical guidance to make the cultural shift happen, to work comfortably in a DevOps environment, and to manage an array of different technologies and tools.

### Qualifications scheme:

- > **PeopleCert DevOps Fundamentals** (14-18 training hours). Candidates gain practical guidance on how to deliver effective DevOps through 15 essential practices.
- > **PeopleCert DevOps Leadership** (14-18 training hours). Candidates get guidance on how to lead the implementation of DevOps practices and how to achieve a cultural shift for better collaboration and communication.
- > **PeopleCert DevOps Engineering** (14-18 training hours). Candidates gain practical guidance on automation tools and how these tools support DevOps culture and practices. coming soon

### Who is it for?

PeopleCert DevOps Qualifications are designed for professionals in Software or Applications Development, IT Operations, IT Service Management, as well as business analysts, project and product managers, and anyone aspiring to gain knowledge of DevOps principles.
